Technical Tooling

Typescript, NextJs, React.js, Vue.js, Storybook, HTML5, CSS3, JavaScript, Next Auth, JQuery, TailwindCSS, React hook form, Shadcn-ui, Redux, Redux RTK query, Redux Toolkit, Bootstrap, Sass, AWS S3, Docker, REST APIs, Responsive Design, Git, GitHub, Webpack, Google Auth, Postman, NPM, MongoDB, Mongoose, Prisma ORM, PostgreSQL, Browser Developer Tools, Laravel blade, UI/UX Design, Figma

Work Experience

Frontend Developer

Nitro SA
Riyadh

January 2024 - Present

- Created user interfaces utilizing **Tailwind CSS**, employing **Next.js** as the framework to build responsive and dynamic web applications.
- Converted design prototypes and wireframes** into fully functional web applications, maintaining uniformity in design.
- Achieved cross-browser compatibility and responsiveness on multiple devices.** Enhanced and updated features in response to user feedback and emerging design trends.
- Collaborated with **backend teams for API integration**, guaranteeing smooth functionality and optimal performance.

Frontend Developer

Msaq
Riyadh

April 2023 - August 2023

- Utilized **frameworks like React** to build dynamic and scalable user interfaces.
- Implemented designs provided by UI/UX teams, ensuring pixel-perfect accuracy and seamless integration with backend functionalities.
- Worked on bug fixes, addressing issues promptly to ensure a smooth and error-free user experience.
- Conducted **regular code reviews, debugging, and addressed issues promptly**, ensuring a smooth and error-free user experience.
- Initiated and managed user testing, gathering feedback for iterative improvements in the UI/UX**, resulting in enhanced usability and customer satisfaction.
- Expertise in successfully initiating key projects, including a pivotal role in **developing and launching the Learning Management System (LMS)**.
- Collaborated closely with a skilled team**, overseeing the platform's development, feature implementation, and rigorous testing to guarantee a smooth launch.

Web Developer

MultiCaret.Inc
Istanbul

June 2021 - March 2023

- Developed **user-facing features using HTML, CSS, and JavaScript** to ensure responsive and interactive web applications.
- Translated design mockups and wireframes** into functional web applications while maintaining design consistency and aesthetics.
- Ensured cross-browser compatibility and responsiveness across various devices through thoughtful design implementation.

- Implemented **updates and enhancements based on user feedback**, evolving design trends, and technological advancements.
- Coordinated with **backend teams for API integration**, ensuring seamless functionality and efficient system performance.

Projects & Extra

- **Nitro**: I led the creation of Nitro Store, a user-friendly sales platform for stores. Using React/Next.js, I programmed the frontend app, turning wireframes into a functional interface. Working closely with teams, we ensured an intuitive user experience and top performance. Nitro Store provides functionality to simplify sales.
- **Bany eCatalog**: I led the creation of a user-friendly sales platform for small businesses using React/NextJS. Collaborating with teams, I ensured a smooth interface and optimal performance. Explore [Bany eCatalog](#) for more.
- **Instalocum**: I contributed to a healthcare management system using Laravel blade and CSS libraries, aiming for an easy-to-use interface. Learn about it at [Instalocum Healthcare System](#).
- **Msaag/Academy LMS**: Participated in building a robust LMS for remote education, focusing on user interface development using React/NextJS and TailwindCSS. Ensured an engaging platform for both educators and students. Visit [LMS Project](#) for more insights.
- **CoastWide Electric**: Specialized in Generator Systems and Electrical Construction services. Discover more about their offerings at [CoastWide Electric](#).
- **MrAuto**: Dedicated Automotive Market offering a platform to showcase cars for sale, listed by both agencies and private sellers. For a range of available vehicles, visit their website at [MrAuto](#).
- **BeMachine**: Personal fitness companion, offering tailored training programs adaptable for gym or home workouts, utilizing various tools to cater to your specific fitness goals. Explore the app on the Google Play Store [here](#) and on the App Store [here](#) to elevate your fitness journey.
- **Plant Projects**: Involved crafting the visual identity for a plant store application or website, focusing on layout, color palettes, typography, and imagery to create an engaging and aesthetic user experience. This encompassed the development of wireframes and prototypes to map out the UI structure, ensuring clarity and ease of use.

Education and Certifications

Website design, MIS Center, Turkey

2017
